In this project, we retrieve data from database for (recommended movies section). All the details for these movies are retrieve from here only.

```
import axios from "axios"

//redux types

import { GET_MOVIE, GET_SPECIFIC_MOVIE } from "../movies.type"

export const getmovies = () => async (dispatch) => {
  try {
    const moviesList = await axios({
      method: "GET",
      url: "http://localhost:5001/movies",
    });

    return dispatch({ type: GET_MOVIE, payload: moviesList.data });
  } catch (error) {
    return dispatch({ type: "ERROR", payload: error });
  }
};

export const getSpecificmovie = (_id) => async (dispatch) => {
  try {
    const moviesList = await axios({
      method: "GET",
      url: `http://localhost:5001/movies/movie/${_id}`,
    });

    return dispatch({
      type: GET_SPECIFIC_MOVIE,
      payload: moviesList.data,
    });
  } catch (error) {
    return dispatch({ type: "ERROR", payload: error });
  }
};
```

**Redux-Reducer for movies**

- For a particular movie - url changes to “/movie/\_id” :
